**THE CHOICE OF OUR EXPERT**

## HIGH TECHNOLOGY FILM VARIOSUN RANGE

“ The film adapts to the light where your car is. It darkens in the sun and lightens in the darker areas. Its unique process offers optimal visibility in any situation and an unstoppable protection against infrared (more than 81% rejection).

**Clear, Medium or Dark, choose your tint! ”**

### CLEAR BOX

After the service, you will get the ClearBox, containing a ProTech® cleaning spray with a formula 100% compatible and a microfiber glove for an efficient application and a perfect result.

## BENEFITS

99%

UV PROTECTION

UV rays are harmful to humans and the main cause of materials discoloration. A treated glass blocks over 99% of UV where an untreated glass rejects only 40%. ProTech® tinted films protect first of all your health and prevent discoloration of your vehicle's interior surfaces.

COMFORT

ProTech® tinted films filter and reduce significantly glare caused by the sun, car lights, and bright lights. The driver and also the passenger's get their visual comfort enhanced. ProTech® tinted films reject up to 77% of solar energy. Actual thermal insulation, they reduce heat in your interior car in the summer and they keep your glass walls warm during winter time.

PRIVACY

The tinted films provide you discretion in all situations and keep you away from prying eyes. This way, you can safely carry your personal possessions without stirring curiosity.

SAFETY

Our "Serenity" range of safety film offers a foolproof protection. Twice greater than normal tinted film thickness, the security films can delay the broken glass and offer outstanding resistance to heat up to 900°C/1652°F. These films improve your protection in case of car accident, assault or fire.
